Automatic Bag in Box
Packing Machine

MODEL : C PACK 3000BB

C Pack 3000BB is a intermittent vertical carton-er. In the carton magazine the cartons are loaded and every cycle one carton is picked up, erected in the holders provided and move to the next station. In this station bottom small flaps are folded and at the next station where the formed pre-made bag is inserted into the carton.

The pre made bags stacked in a magazine, just above the carton carrier, are taken one by one in every cycle by vacuum arm which moves in synchronization with the carton erected at the bottom. The bags are opened and inserted into the erected carton in the holder underneath thus forming the bag in box. The carton with the formed bag is moved to different stations where bottom flaps are glued, product filled, packet jogged to settle the product, rammed for product compact, top sealed, top flap glued and folded and the packet is ejected out to the pressure conveyor for the glue to set and the packets come

Technical Specification

Output	Upto 30 packets / minute depending upon product and pack size .	
Man Power	One Operator	
Size Change Over	Possible	
Pack Size :		
Carton Dimensions - mm	Min	Max
Length	80	150
Width	45	100
Height	100	230
Machine Dimension	L 8 mtr X B 6.5 mtr X H 4.25 mtr	
Electric Power	18Kw, 440V / 50 Hz / 3 Phase with neutral and double earth	
Compressed Air (Dry)	350 Ltrs / Minute at 6 Kg/cm ²	

- Attachment**
- Multi head weigher with Mounting Frame
 - Take out pressure conveyor for cold glue setting

- Optional**
- Bucket Elevator with Vibratory feeder
