≡ T PACK SERIES ≡

Automatic Tin Packing Line with  
Vacuumising and Gas Flushing

MODEL : TPACK 2000 D

T Pack 2000D is a Complete Automatic Tin Packing Line comprising of Tin Cleaning, UV Sterilisation chamber, Tin Filling with load cell back up for accurate weighing, Automatic online Lid Clinching, Inline automatic Vacuumising and gas flushing units, online automatic final lid seamer and Tin capping unit. All the units are connected through transfer conveyor and are PLC controlled with HMI for operator convenience. Man and material safety features are incorporated in the design.

Change over one size to another size is possible with standard change parts, which extends the machine utility and enhance productivity.

### Technical Specification

Output	20 - 25 Tins / minute depending upon the product and pack size
Man Power	One Operator + 2 Skilled workers for loading Tin and Cap, etc.,
Size Change Over	Possible
Power	28 Kw, 440V, 50Hz, 3 Phase with Neutral and Double Earth
Compressed Air	350 Ltrs / minute at 5 Kg / cm <sup>2</sup>
Nitrogen 99.9 percentage purity	30NM <sup>3</sup> / HR at 6Kg/cm <sup>2</sup>
Packing Line Layout	Straight, "L", "U" Line layouts are possible to suite the customers packing hall dimensions

### Optional Attachments

Screw conveyor with Hopper for material feeding

Plastic cap applicator attachment
